MARIS KURSITIS

LANGUAGES

English	C1
Latvian	C1
Russian	Native

TECHNICAL SKILLS

Frontend

React, Next.js, TypeScript, Redux Toolkit Query, MUI, Tailwind CSS, Responsive Design

Backend

Node.js, NestJS, TypeScript, REST APIs, Swagger (OpenAPI), .NET, ASP.NET Core, Python

Databases

SQL, NoSQL, SQLite, Drizzle ORM, Database Design

Architecture & Security

Microservices, Distributed Systems, Clean Architecture, SOLID, JWT, OAuth2, RBAC, Kubernetes Secrets, Azure Key Vault

Cloud & DevOps

Microsoft Azure, Azure Functions, Docker, Kubernetes (K8s), CI/CD

Testing & AI

Jest, Unit & Integration Testing, OpenAI Codex, Claude Code

PROJECTS

Cryptocurrency Trend Forecasting & Web3 Bot

2022 - 2023

- ML forecasting with Python, TensorFlow, NumPy and pandas.
- Regression and correlation analysis for market data.
- Backend data pipelines and Glassnode API integration.
- React frontend with Web3 wallet integration.

Full-Stack Developer

+371 20060408 | linkofefrikert@gmail.com
www.linkedin.com/in/mariswkur | Riga, Latvia

PROFESSIONAL SUMMARY

Full-Stack Developer with 4+ years of professional experience building enterprise and FinTech applications using Node.js, TypeScript, React, and Next.js. Skilled in developing REST APIs, distributed systems, and scalable web applications, with additional experience in NestJS.

Strong background in financial data processing (ISO 20022), Microsoft Azure, and secure application development. Capable of delivering end-to-end solutions, from architecture and implementation to deployment.

EXPERIENCE

Full-Stack Developer

02/2026 - Present

Self-employed

Remote

- Designed and developed a Telegram-based giveaway management system using Node.js, TypeScript, grammY, SQLite, and Drizzle ORM.
- Implemented role-based access control, player eligibility validation, automated winner selection, and voucher distribution.
- Ensured data consistency through database transactions and implemented CSV-based data imports.
- Developed backend services using NestJS, implementing REST APIs, modular architecture, and database integrations.
- Built responsive web applications using Next.js, React, and TypeScript, while providing ongoing maintenance and feature enhancements.

Senior Software Developer

05/2024 - 11/2025

Fintecor

Riga, Latvia

Banking software solutions

- Designed and developed Node.js backend services for financial transaction processing and payment workflows in regulated banking environments.
- Implemented ISO 20022 CAMT.053 XML generation and XSD schema validation.
- Built Azure Functions for automated document generation and integrations with Azure Blob Storage and SharePoint.
- Developed frontend applications using Next.js, React, TypeScript, MUI, and Redux Toolkit Query.
- Built reusable UI components, including data tables with advanced filtering and pagination.
- Troubleshot XML validation, financial reconciliation, and Azure Functions execution issues.
- Collaborated with QA engineers, business analysts, and compliance teams to deliver production-ready solutions.

Software Developer

01/2022 - 04/2024

Latvenergo AS

Riga, Latvia

Latvenergo Group is the largest power supplier in the Baltics.

- Developed and maintained enterprise backend services using Node.js and REST APIs.
- Improved existing REST APIs, enhancing performance, reliability, and maintainability.
- Documented and tested API endpoints using Swagger (OpenAPI).
- Worked with Docker and Kubernetes (K8s) in containerized application environments.
- Managed application secrets and sensitive configuration using Kubernetes Secrets.
- Collaborated with development teams using Jira for task tracking and issue management.

EDUCATION

Bachelor's Degree in Computer Science 2019 - 2023

Riga Technical University
